

Shibata Minami Senior High Shcool

新潟県立新発田南高等学校

S hcool Information

Our school was founded in 1917, and we will celebrate its 100th anniversary next year.

Since 1983 this school has had 2 main departments, the regular course, and the technical course. The technical course is broken into 3 smaller parts: Machinery, Architecture, and Civil Engineerings.

Aims of Education

誠実
自主
創造

We strive to cultivate a strong mind and body for the sake of our students as well as society.

Students will build a strong moral fiber by being in an environment that enhances their intelligence.

We seek to improve our society by refining our technical skills, expanding our imaginations, and building a better tomorrow.

T echnical Course

The students take general education courses during their first academic year. After that, they are free to choose between focusing on the regular courses or the technical courses.

In either case, students are able to take academic courses to prepare them for college and university.

Machinery course

Civil engineering course

Architectural course

G eneral Course

In the first year, the students will receive general education courses. In the second year, the students can choose to focus more heavily on math and science courses, or language courses like Japanese or English.

School Events Club Activity

There are various events throughout the year such as sports festivals and cultural festivals.

There are a variety of different clubs at Shibata Minamai. Many students are active competitive events such as the track and field tournaments. Even so, students do their best to try and balance studying and club activities.
